

Bese Hema Sagar

Information Technology Student – JNTU-GV

hemasagarbese65@gmail.com +91 9010437275

GitHub: github.com/hemasagarbese — LinkedIn: hema-sagar-bese

Career Objective

Motivated and detail-oriented Information Technology student with strong foundations in programming, web development, databases, and problem-solving. Passionate about Full Stack Development, Artificial Intelligence, and software engineering. Seeking opportunities to apply technical skills and contribute to innovative software solutions.

Education

JNTU-GV College of Engineering 2023 – Present
Bachelor of Technology (B.Tech), Information Technology
Current Percentage: 79%

GRC Junior College, Ramachandrapuram 2021 – 2023
Intermediate (MPC) – 88%

ZP High School, Ramabhadrapuram 2021
SSC – 93%

Technical Skills

Languages: Python, Java, C

Frontend: HTML5, CSS3, JavaScript, React.js, Vite

Backend & Database: Java, Node.js (Basic), PostgreSQL, MySQL

Tools & Concepts: Git, GitHub, REST APIs, Data Structures, DBMS, OOP, Operating Systems

Experience

Quantum Valley Hackathon Participant – 2025

- Developed a Credit Card Fraud Detection System using Quantum Machine Learning concepts.
- Performed data preprocessing, feature selection, and model evaluation.
- Collaborated within a team to deliver a working solution under strict deadlines.

Smart India Hackathon (SIH) Participant – 2025

- Developed an Online Learning Application for low internet connectivity.
- Contributed to frontend and backend development activities.
- Improved accessibility and performance for rural users.

Projects

PixelMind AI – AI Image Generator Platform React.js, AI APIs

- Building an AI-powered image generation and editing platform with chatbot assistance.
- Implementing authentication, prompt management, and image history tracking.
- Planning PostgreSQL integration and a futuristic responsive interface.

CryptoPulse – Real-Time Crypto Tracker React.js, CoinGecko API, Chart.js

- Developed a real-time cryptocurrency dashboard with live market data.
- Integrated charts, crypto news, trending coins, and watchlist features.

- Designed a modern cyberpunk-inspired responsive interface.

EchoNova – Indian Music Universe

React.js, Vite, Web Audio API

- Built a multi-page music streaming platform with real-time playback.
- Implemented favorites, recently played history, and audio visualizers.
- Designed a responsive glassmorphism-inspired user interface.

RecipeVerse – Discover, Cook, Enjoy

React.js, React Router, Context API

- Developed a recipe discovery platform with categorized recipes and search functionality.
- Implemented multilingual support and favorites management.
- Created detailed recipe pages with ingredients and cooking instructions.

Online Quiz Portal

React.js

- Developed a dynamic quiz platform supporting multiple categories.
- Implemented timers, random question generation, and score evaluation.
- Designed a responsive interface for an enhanced learning experience.

Hospital Appointment Portal

Java, Advanced Java Programming

- Built a hospital appointment management system for patient scheduling.
- Implemented registration, appointment booking, and scheduling modules.
- Developed backend logic for managing patient and appointment records.

Online Classes App for Rural Areas

Web Technologies

- Designed a low-bandwidth online learning application for rural communities.
- Optimized content delivery for slow internet environments.
- Focused on accessibility, usability, and application performance.

Credit Card Fraud Detection System

Python, Machine Learning

- Built a fraud detection model using machine learning algorithms.
- Applied preprocessing, feature engineering, and classification techniques.
- Evaluated model performance using standard metrics.

Internships

UptoSkills

Web Development Intern — April-2026 to July 2026

- Developed and maintained backend functionalities for web applications.
- Worked with databases, APIs, and server-side logic to improve application performance.
- Collaborated with team members to implement scalable and efficient backend solutions.

CodTech IT Solutions

Frontend Developer Intern — June-2026 to July-2026

- Developed responsive and user-friendly web interfaces using modern frontend technologies.
- Implemented interactive UI components and optimized website performance.
- Collaborated with developers to integrate frontend applications with backend services.

Additional Information

Soft Skills: Problem Solving, Communication, Teamwork, Leadership, Analytical Thinking, Time Management

Areas of Interest: Full Stack Web Development, Frontend Development, Artificial Intelligence, Machine Learning, Python Programming.

Languages Known: English, Telugu

Career Goal: To begin my career as a Software Developer and contribute to innovative products while continuously enhancing my technical expertise.
